

DestinationImagiNation at Cave Spring Elementary

Destination ImagiNation (DI) is an educational program in which student teams solve open-ended Challenges and present their solutions at a Tournament. DI is designed to teach three essential skills: creativity, teamwork and problem solving. DI participants are tested to think on their feet, work as a team and devise original solutions that satisfy the requirements of the Challenges. DI participants gain more than just basic knowledge and skills—they learn to unleash their imaginations and take unique approaches to problem solving.

Destination ImagiNation is a program that teaches students a remarkable set of skills and tools that will transform the way they solve problems for the rest of their lives.

- Destination ImagiNation is the largest Creative Problem Solving (CPS) program in the world.
- Destination ImagiNation teaches kids 21st-century skills through Challenges that foster creative and critical thinking.

A Destination ImagiNation Challenge is an open-ended exercise that prompts participants to use creativity and teamwork to solve a problem. Because everyone is unique, we have developed seven different Team Challenge categories to unleash every child's potential. All teams also participate in an Instant Challenge at a Tournament.

Our season is closely tied to the school year, which makes participation an ideal after-school activity. A typical Destination ImagiNation team will spend 8 to 16 weeks preparing and rehearsing for their regional Tournament. The highest-placing teams from regional Tournaments can advance to state/ country-level Tournaments, and the highest placing teams from those Tournaments are invited to Global Finals—an event that takes place in late May and brings together teams from across the U.S. and more than 30 countries.

If interested in being a parent volunteer please contact Cheryl Shupe at 776 8581 or cshupe1@cox.net by September 19th.
